## DETAILED ACTION

### *Claim Objections*

1. Claim 8 is objected to because of the following informalities: The phrase 'the metallic element' has insufficient antecedent basis. For purposes of examination, the phrase will be interpreted to mean any organic material. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 8 – 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohta et al (U.S. Patent No. 5,954,866).

With regard to Claim 8, Ohta et al disclose a coating solution (water – soluble resin in water; column 3, lines 10 – 11) which contains an element comprising carbon (carbon black, therefore comprising the element carbon; column 4, lines 60 – 62), a copper compound (column 4, line 64), and an element comprising iron (iron oxide; column 4, line 64).

With regard to Claim 9, the coating solution comprises an organic material comprising an acrylic resin (column 2, lines 48 – 49).

With regard to Claim 10, the coating solution contains chlorine (polyvinyl chloride, therefore comprising the element chlorine; column 7, lines 52 – 53).
